

Specification

Please replace paragraph 0020 beginning at page 10, with the following rewritten paragraph:

-- FIGS. 3a and 3b are respectively, band diagrams of a tunneling electron injector in the (a) flat band condition and (b) under bias for injection of electrons in accordance with a specific embodiment of the present invention.--

Request for Allowance

New substitute drawings are submitted in compliance with 37 CFR 1.84. The Notice To File Corrected Application Papers stated that "Figure(s) 3C described in the specification" was omitted from the application. An amendment was made to specification deleting the occurrence of FIG. 3c since there was no FIG. 3c in the application.

Thus, it is believed that this Amendment places the above-identified patent application into condition for allowance. Early favorable consideration of this application is earnestly solicited.

If, in the opinion of the Examiner, an interview would expedite the prosecution of this application, the Examiner is invited to call the undersigned attorney at the number indicated below.

Dated: 11/20, 2001
